

Sample Watershed Plan

Goals:

- Reduce sediment loading by 30% within five years.
- Install structural BMPs to stabilize streambanks.
- Enhance aquatic habitat diversity through targeted BMP implementation.

Best Management Practices (BMPs):

- Sediment Basin
- Cover Crops
- Streambank Stabilization
- Heavy Use Area Protection

Cost Estimate: Phase 1 Implementation

BMPs	Amount	Estimated Cost
Sediment Basin	2 each	\$12,500
Cover Crops	800 ac	\$58,400
Streambank Stabilization	1,200 ft	\$172,904
Heavy Use Area Protection	6 each	\$36,000
Total Estimated Cost		\$279,804
